Ground yourself with these earth-inspired tones. There is no better way to channel a serene nature-inspired activewear look than with a REPREEVE recycled fabric and moody hues. We have updated our Endurance Collection with four new colors selected for 2022. Hydrangea captures the beauty of a show-stopping flower, Simply Taupe brings soft sandy vibes, Lilac Grey inspires a delicate floral feeling, and Sea Pink shares the sunset hues that bring a sense of harmony. Stay in step with nature and reconnect to our planet by evolving your activewear designs using these NEW recycled Endurance colors. 13 plastic bottles go into each yard of Endurance. All together, REPREEVE has recycled 25,000,000,000 water bottles around the world.

URBAN ATHLETE

Urban athletics has been growing in popularity for the past few years, and this trend will continue to become more mainstream in 2022. Designers grab inspiration from sports uniforms, different cultures, and city-based artists to create stylish new Athleisure looks designed for functionality and performance. As the world moves on from 2020, many people will continue working from home, causing the desire for comfort to grow tremendously. Luxurious feeling fabrics, styling, and design are the top three aspects of the Urban Streetwear trend. Our Merit collection is durable and perfect for any streetwear sport-influenced design. Merit also has excellent coverage, high abrasion resistance, moisture-wicking capabilities, and four-way stretch to create any look inspired by streetwear fashion.

Step in outside and take a deep breath of the countryside air! In recent seasons, Cottagecore has quickly become a trend popping up on feeds all over social media. According to Davina Ogilvie, founder of Wovn Home, Cottagecore, "[a]esthetically, it's a nod to the traditional English countryside style, romantic and nostalgic." Imagine sitting in an open field relaxing with the sweet scent of wildflowers after a fulfilling workout. Floral prints, pastel shades, and cozy softness delightfully describe this trend. Slip into the fantasy with our Dharma activewear fabric collection, a heathered circular knit with a wicking finish. Available in six beautiful colors, which are perfect for elevating feelings of relaxation and wellness both during and after exercise.

high tech

Take it up a notch with new high-tech performance wear fabrics. Each year we see technological advances, with many of these innovations becoming accessible to the sports industry. Buzz is growing around phrases like wearable tech and "smart" clothing. Our Jaguar collection has many components and properties that will take performance to a higher level. The Jaguar fabric features high elasticity, UV protection, and a moisture management formula that allows the material to handle internal moisture, thus making garments pleasant to wear. This beautiful fabric is now available in 105 colors by the single roll!
